

- 1) Open your **Google Chrome browser**, type `chrome://settings/content` in the address bar and press Enter.

- 2) On the content settings screen, locate Flash player settings. Select Allow sites to run Flash, then click Done to save the change.

- 3) If you want to add more sites that allow Flash Player, click the Manage exceptions... button.

- 4) Type in the site address here and then click Done to save the change.
